In the class, i haven't really saved a draft work because i work on the same draft sheet depending on which assignment im working on. Here's pictures on a draft i had in my notebook

bibliography which was way higher than what I expected to get in the class which was an A. Later on we were arranged groups, for work on a presentation for our assigned material. I enjoyed it a lot because I put a lot of was team bonding with my classmates, we learned a lot about each other and we also got the job done. Doctor Roth said our presentation both did + plus she enjoyed it. So I'm guessing I obtained what we did a lot of research which we am A for the group presentation, which is also higher than my expected grade. Lastly we did a final with a total of 3 pages, 12 sources. At first it intimidating but once I understood what to she wasn't really that much to it but to what your claim is on the final ... earned a B- for my good arguments
